Solving Problems with NMR Spectroscopy

Atta-ur-Rahman, Muhammad Iqbal Choudhary, Atia-tul- Wahab

Solving Problems with NMR Spectroscopy Atta-ur-Rahman, Muhammad Iqbal Choudhary, Atia-tul-Wahab

Solving Problems with NMR Spectroscopy, Second Edition, is a fully updated and revised version of the best-selling book. This new edition still clearly presents the basic principles and applications of NMR spectroscopy with only as much math as is necessary. It shows how to solve chemical structures with NMR by giving many new, clear examples for readers to understand and try, with new solutions provided in the text.

It also explains new developments and concepts in NMR spectroscopy, including sensitivity problems (hardware and software solutions) and an extension of the multidimensional coverage to 3D NMR. The book also includes a series of applications showing how NMR is used in real life to solve advanced problems beyond simple small-molecule chemical analysis.

This new text enables organic chemistry students to choose the most appropriate NMR techniques to solve specific structures. The problems provided by the authors help readers understand the discussion more clearly and the solution and interpretation of spectra help readers become proficient in the application of important, modern 1D, 2D, and 3D NMR techniques to structural studies.

- Explains and presents the most important NMR techniques used for structural determinations
- Offers a unique problem-solving approach for readers to understand how to solve structure problems
- Uses questions and problems, including discussions of their solutions and interpretations, to help readers understand the fundamentals and applications of NMR
- Avoids use of extensive mathematical formulas and clearly explains how to implement NMR structure analysis
- Foreword by Nobel Prize winner Richard R. Ernst

New to This Edition

- Key developments in the field of NMR spectroscopy since the First Edition in 1996
- New chapter on sensitivity enhancement, a key driver of development in NMR spectroscopy
- New concepts such as Pulse Field Gradients, shaped pulses, and DOSY (Diffusion Order Spectroscopy) in relevant chapters
- More emphasis on practical aspects of NMR spectroscopy, such as the use of Shigemi tubes and various types of cryogenic probes
- Over 100 new problems and questions addressing the key concepts in NMR spectroscopy
- Improved figures and diagrams
- More than 180 example problems to solve, with detailed solutions provided at the end of each chapter

From reader reviews:

Andrea Behnke:

Book is actually written, printed, or illustrated for everything. You can learn everything you want by a publication. Book has a different type. We all know that that book is important point to bring us around the world. Beside that you can your reading expertise was fluently. A reserve Solving Problems with NMR Spectroscopy will make you to be smarter. You can feel more confidence if you can know about every little thing. But some of you think in which open or reading a new book make you bored. It is not make you fun. Why they are often thought like that? Have you seeking best book or appropriate book with you?

Joseph Myrick:

Hey guys, do you desires to finds a new book to study? May be the book with the concept Solving Problems with NMR Spectroscopy suitable to you? The particular book was written by well known writer in this era. Often the book untitled Solving Problems with NMR Spectroscopy is a single of several books this everyone read now. This particular book was inspired a lot of people in the world. When you read this publication you will enter the new way of measuring that you ever know previous to. The author explained their plan in the simple way, therefore all of people can easily to understand the core of this e-book. This book will give you a large amount of information about this world now. To help you to see the represented of the world in this particular book.

Jerry Schooler:

That book can make you to feel relax. This specific book Solving Problems with NMR Spectroscopy was multi-colored and of course has pictures around. As we know that book Solving Problems with NMR Spectroscopy has many kinds or style. Start from kids until teens. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. Therefore not at all of book usually are make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading that.

Tim Gonzalez:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from a book. Book is prepared or printed or descriptive from each source which filled update of news. Within this modern era like right now, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just trying to find the Solving Problems with NMR Spectroscopy when you desired it?
