The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) John M. Gottman

Divorce rates are at an all-time high. But without a theoretical understanding of the processes related to marital stability and dissolution, it is difficult to design and evaluate new marriage interventions. *The Mathematics of Marriage* provides the foundation for a scientific theory of marital relations. The book does not rely on metaphors, but develops and applies a mathematical model using difference equations. The work is the fulfillment of the goal to build a mathematical framework for the general system theory of families first suggested by Ludwig Von Bertalanffy in the 1960s. The book also presents a complete introduction to the mathematics involved in theory building and testing, and details the development of experiments and models. In one "marriage experiment," for example, the authors explored the effects of lowering or raising a couple's heart rates. Armed with their mathematical model, they were able to do real experiments to determine which processes were affected by their interventions. Applying ideas such as phase space, null clines, influence functions, inertia, and uninfluenced and influenced stable steady states (attractors), the authors show how other researchers can use the methods to weigh their own data with positive and negative weights. While the focus is on modeling marriage, the techniques can be applied to other types of psychological phenomena as well.

From reader reviews:

Andrew Wilson:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each e-book has different aim as well as goal; it means that reserve has different type. Some people experience enjoy to spend their time and energy to read a book. They may be reading whatever they consider because their hobby is definitely reading a book. Why not the person who don't like reading through a book? Sometime, individual feel need book once they found difficult problem or perhaps exercise. Well, probably you will need this The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press).

Rosa Johnson:

As people who live in the particular modest era should be update about what going on or info even knowledge to make them keep up with the era which is always change and make progress. Some of you maybe will certainly update themselves by examining books. It is a good choice for yourself but the problems coming to an individual is you don't know what type you should start with. This The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) is our recommendation so you keep up with the world. Why, because this book serves what you want and wish in this era.

Joshua Nichols:

The book untitled The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) contain a lot of information on it. The writer explains the girl idea with easy method. The language is very simple to implement all the people, so do not necessarily worry, you can easy to read the idea. The book was published by famous author. The author provides you in the new era of literary works. It is easy to read this book because you can continue reading your smart phone, or program, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can open their official web-site along with order it. Have a nice examine.

James Helm:

You can spend your free time to see this book this guide. This The Mathematics of Marriage: Dynamic Nonlinear Models (MIT Press) is simple to deliver you can read it in the area, in the beach, train and also soon. If you did not have much space to bring the printed book, you can buy typically the e-book. It is make you much easier to read it. You can save the actual book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.
