Economic Analysis for Ecosystem-Based Management: Applications to Marine and Coastal Environments

Daniel Holland, James Sanchirico, Robert Johnston, Deepak Jogleka

Ocean and coastal management regimes are increasingly subject to competing demands from stakeholders. Regulations must not only address fishing, recreation, and shipping, but also sand and gravel mining, gas pipelines, harbor/port development, offshore wind and tidal energy facilities, liquefied natural gas terminals, offshore aquaculture, and desalinization plants. The growing variety and intensity of ocean and coastal uses increases the call for a more holistic, comprehensive, and coordinated management approach that recognizes the often complex relationships between natural and human systems. For both economist and non-economist audiences, this book describes ways in which economic analysis can be an important tool to inform and improve ecosystem-based management (EBM). Topics include modeling economic impacts, benefit-cost analysis, spatial considerations in EBM, incentives and human behaviors, and accounting for uncertainty in policy analysis. Throughout the book the authors elucidate the different kinds of insights which can be gained from the use of different economic tools. In this rigorous and accessible work, the authors defy the conventional stereotype that economic perspectives necessarily favor the greatest commercial development. Instead, they demonstrate how comprehensive economic analyses consider the full range of potential services offered by marine and coastal ecosystems, including the conservation of biodiversity and creation of recreational opportunities.

From reader reviews:

Larry Hunter:

The particular book Economic Analysis for Ecosystem-Based Management: Applications to Marine and Coastal Environments will bring that you the new experience of reading the book. The author style to clarify the idea is very unique. In the event you try to find new book you just read, this book very suitable to you. The book Economic Analysis for Ecosystem-Based Management: Applications to Marine and Coastal Environments is much recommended to you to study. You can also get the e-book through the official web site, so you can quicker to read the book.

Marsha Bridges:

This Economic Analysis for Ecosystem-Based Management: Applications to Marine and Coastal Environments is brand new way for you who has interest to look for some information as it relief your hunger details. Getting deeper you into it getting knowledge more you know or perhaps you who still having tiny amount of digest in reading this Economic Analysis for Ecosystem-Based Management: Applications to Marine and Coastal Environments can be the light food for yourself because the information inside this specific book is easy to get through anyone. These books produce itself in the form which is reachable by anyone, yes I mean in the e-book application form. People who think that in e-book form make them feel drowsy even dizzy this publication is the answer. So there is absolutely no in reading a reserve especially this one. You can find actually looking for. It should be here for an individual. So , don't miss the item! Just read this e-book variety for your better life as well as knowledge.

Rose Watkins:

That publication can make you to feel relax. This specific book Economic Analysis for Ecosystem-Based Management: Applications to Marine and Coastal Environments was vibrant and of course has pictures around. As we know that book Economic Analysis for Ecosystem-Based Management: Applications to Marine and Coastal Environments has many kinds or type. Start from kids until teenagers. For example Naruto or Detective Conan you can read and believe that you are the character on there. Therefore , not at all of book usually are make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading in which.

Hazel Fletcher:

As a student exactly feel bored to reading. If their teacher inquired them to go to the library or to make summary for some guide, they are complained. Just little students that has reading's heart or real their hobby. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that

on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Economic Analysis for Ecosystem-Based Management: Applications to Marine and Coastal Environments can make you truly feel more interested to read.
