Chemicals, Environment, Health: A Global Management Perspective

Chemicals, Environment, Health: A Global Management Perspective

The past 40 years have seen a phenomenal growth in globally oriented public and private initiatives related to chemical and environmental issues. The groundbreaking 1972 United Nations Conference on the Human Environment held in Stockholm was the event responsible for initiating framework for global environmental policies, including those addressing chemical safety. It gave rise to the first World Environment Day and the creation of the United Nations Environment Programme, leading the way to the acknowledgement that sustainable development is the most logical and viable pathway to preserve and enhance our environment for future generations.

Chemicals, Environment, Health: A Global Management Perspective presents an overview of the noteworthy conferences, organizations, and international treaties that focus on chemicals management and policy. It takes into account special challenges faced by developing countries regarding chemicals safety. From the Stockholm Conference to follow-ups in Rio and Johannesburg, it provides concise coverage of a vast swath of information. It highlights pivotal agreements such as the Basel, Rotterdam, and Stockholm Conventions, the more expansive Strategic Approach to International Chemicals Management, as well as key regional agreements such as the European Union's REACH legislation. The book includes invited essays in areas such as emergencies and financing instruments, and offers a clear look at future challenges and opportunities.

Written by a team of authors from all continents, with backgrounds in international organizations, national governments, academia, industry, and NGOs, the book reflects a wide experience from a multitude of perspectives.

A valuable guidebook to global chemicals management cooperation, this book reviews and analyzes multi-lateral efforts established to address the potential risks of chemicals on the world stage.
