The Pea Crop: A Basis for Improvement P. D. Hebblethwaite, M. C. Heath

The Pea Crop: A Basis for Improvement documents the proceedings of the University of Nottingham 40th Easter School in Agricultural Science, held at the School of Agriculture, Sutton Bonington, 2-6 April 1984. The aim of the conference was to formulate a basis for improving the pea crop by bringing together international scientists to present research findings and review published work on a wide range of subject areas encompassing pea genetics, plant breeding, agronomy, crop and plant physiology, utilization, and marketing.

This volume contains 42 papers organized into 10 parts. Part I discusses the production, research and development, and future prospects of the pea crop. The papers in Part II focus on the need to improve the pea crop. Part III examines the genetic aspects of improved pea crop production. Part IV deals with crop improvement techniques. The studies in Part V are devoted to the impact of the environment on crop growth. Part VI covers diseases, pests, and weed control while Part VII presents plant physiological studies. Part VIII takes up pea fruit and seed development. Part IX focuses on Rhizobium while Part X discusses the processing, marketing, and consumption of peas.
