Financial Analysis and Risk Management: Data Governance, Analytics and Life Cycle Management

Financial Analysis and Risk Management: Data Governance, Analytics and Life Cycle Management

The Global Financial Crisis and the Eurozone crisis that has followed have drawn attention to weaknesses in financial records, information and data. These weaknesses have led to operational risks in financial institutions, flawed bankruptcy and foreclosure proceedings following the Crisis, and inadequacies in financial supervisors' access to records and information for the purposes of a prudential response. Research is needed to identify the practices that will provide the records, information and data needed to support more effective financial analysis and risk management. The unique contribution of this volume is in bringing together researchers in distinct domains that seldom interact to identify theoretical, technological, policy and practical issues related to the management of financial records, information and data. The book will, therefore, appeal to researchers or advanced practitioners in the field of finance and those with an interest in risk management, computer science, cognitive science, sociology, management information systems, information science, and archival science as applied to the financial domain.

Gregory Polster:

Reading a book for being new life style in this calendar year; every people loves to study a book. When you read a book you can get a large amount of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these us novel, comics, in addition to soon. The Financial Analysis and Risk Management: Data Governance, Analytics and Life Cycle Management will give you a new experience in looking at a book.

James Waddell:

As a college student exactly feel bored in order to reading. If their teacher requested them to go to the library or make summary for some guide, they are complained. Just little students that has reading's heart and soul or real their hobby. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading seriously. Any students feel that looking at is not important, boring along with can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you. As we know

that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Financial Analysis and Risk Management: Data Governance, Analytics and Life Cycle Management can make you really feel more interested to read.
