Henri Bergson's Creative Evolution 100 Years Later: Special Issue of SubStance, Issue 114, 36:3 (2007)

This special issue of *SubStance* (2007) celebrates the centennial of Henri Bergson's *Creative Evolution*, published in 1907. Since evolution is a living process and not a completed history, any understanding of it must necessarily be open-ended. If no one can have the last word, Bergson writes, the project of understanding evolution "will only be built up by the collective and progressive effort of many thinkers, of many observers also, completing, correcting and improving one another."

Included in the issue are articles from Bergson scholars from the United States, Japan, France and Great Britain. Topics in the issue range from Bergson's encounters with Darwin, Nietzsche, Derrida and Deleuze, and from the analytical to the metaphysical.
