Learning Apache Mahout Classification Ashish Gupta

Build and personalize your own classifiers using Apache Mahout

About This Book

- Explore the different types of classification algorithms available in Apache Mahout
- Create and evaluate your own ready-to-use classification models using real world datasets
- A practical guide to problems faced in classification with concepts explained in an easy-to-understand manner

Who This Book Is For

If you are a data scientist who has some experience with the Hadoop ecosystem and machine learning methods and want to try out classification on large datasets using Mahout, this book is ideal for you. Knowledge of Java is essential.

What You Will Learn

- Apply machine learning techniques in the area of classification
- Categorize the unknown items by using the classification model in Apache Mahout
- Use the classifier to classify text documents
- Implement a multilayer perceptron to map sets of input to appropriate output sets
- Develop the Hidden Markov model for a system with hidden states
- Build and deploy an e-mail classifier that can predict the delivery of incoming mail

In Detail

This book is a practical guide that explains the classification algorithms provided in Apache Mahout with the help of actual examples. Starting with the introduction of classification and model evaluation techniques, we will explore Apache Mahout and learn why it is a good choice for classification.

Next, you will learn about different classification algorithms and models such as the Naïve Bayes algorithm, the Hidden Markov Model, and so on.

Finally, along with the examples that assist you in the creation of models, this book helps you to build a mail classification system that can be produced as soon as it is developed. After reading this book, you will be able to understand the concept of classification and the various algorithms along with the art of building your own classifiers.

From reader reviews:

Nannie Hand:

This Learning Apache Mahout Classification tend to be reliable for you who want to be considered a successful person, why. The explanation of this Learning Apache Mahout Classification can be one of several great books you must have is actually giving you more than just simple looking at food but feed you actually with information that probably will shock your earlier knowledge. This book will be handy, you can bring it everywhere and whenever your conditions at e-book and printed types. Beside that this Learning Apache Mahout Classification forcing you to have an enormous of experience including rich vocabulary, giving you demo of critical thinking that we know it useful in your day task. So , let's have it and luxuriate in reading.

Debra Davis:

The actual book Learning Apache Mahout Classification will bring you to the new experience of reading a book. The author style to describe the idea is very unique. Should you try to find new book to learn, this book very suitable to you. The book Learning Apache Mahout Classification is much recommended to you to study. You can also get the e-book from your official web site, so you can quickly to read the book.

Judy Turner:

Are you kind of busy person, only have 10 or even 15 minute in your day time to upgrading your mind talent or thinking skill actually analytical thinking? Then you are having problem with the book compared to can satisfy your short period of time to read it because this all time you only find e-book that need more time to be examine. Learning Apache Mahout Classification can be your answer because it can be read by an individual who have those short spare time problems.

Douglas Ham:

Reading a guide make you to get more knowledge from the jawhorse. You can take knowledge and information originating from a book. Book is published or printed or highlighted from each source which filled update of news. On this modern era like currently, many ways to get information are available for a person. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just seeking the Learning Apache Mahout Classification when you needed it?
