Human Memory: Exploration And Application- (Value Pack w/MySearchLab) Karl Haberlandt

MySearchLab provides students with a complete understanding of the research process so they can complete research projects confidently and efficiently. Students and instructors with an internet connection can visit www.MySearchLab.com and receive immediate access to thousands of full articles from the EBSCO ContentSelect database. In addition, MySearchLab offers extensive content on the research process itself—including tips on how to navigate and maximize time in the campus library, a step-by-step guide on writing a research paper, and instructions on how to finish an academic assignment with endnotes and bibliography.

Now is an exciting time for the study of human memory. New research methods are being introduced, discoveries are reported, and fierce debates are waged in both research labs and the public arena. This book provides an up-to-date overview of the multifaceted study of memory. Written in a lucid and engaging style, this book presents cutting edge advances in human memory research fully integrated within the mainstream of the cognitive approach. It introduces research issues, describes important research paradigms, and identifies connections across different traditions of memory research. A variety of perspectives are presented, including psychobiological, developmental, neuropsychological, applied, and the traditional cognitive point of view. Psychologists and professors.
