**Accounting for the Environment: Second Edition** Robert H Gray, Jan Bebbington

'This book is a good comprehensive text and comes highly recommended to anyone currently involved in, looking to get involved in, or just interested in environmental management, environmental accounting and reporting' - *Pacific Accounting Review*

This is the long-awaited 2nd edition of the benchmark publication that helped shape the developing agenda of environmental accounting. This excellent new edition provides an overview of the subject ranging from environmental management to sustainability, and integrates the major advancements that have occurred since the first edition - in both research and practice. It introduces and explains environmental issues as they relate to accountants today.

This new work also places an increased emphasis on the emerging research literature in the field and reveals a consciousness of the difficulties of developing an environmental agenda in business. It makes an excellent stand-alone text for lower level students, a firm base from which the advanced student or researcher can explore research and more complex issues, and a useful guide for practitioners seeking to understand and implement environmental practice.
