Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies

Victoria E. O'Collins, Geoffrey A. Donnan, Malcolm R. Macleod, David W. Howells

A quantitative and qualitative comparison of contemporary neuroprotection and thrombolytic stroke trials and their preclinical animal counterparts has been undertaken, with meta-analysis (DerSimonian and Laird, 1986) used to evaluate imaging and histological outcomes. Results from 35 clinical trials including 5,532 patients were compared with data from 3,145 pre-clinical acute-stroke experiments in 45,476 animals. While clinical trials tended to be of higher methodological quality and have larger sample sizes than animal experiments (71 patients vs. 7 animals per group), both were similarly underpowered owing to the greater variability in human stroke (average standard deviation of mean in humans 99% v 30% in animals). Proportionally, animal infarcts were almost four times larger than human infarcts in untreated control groups (27% v 8% of the hemisphere) although there was considerable variability in size owing to comorbidities and stroke type. Eighty-six percent of animal studies and 54% of clinical trials reported smaller infarcts in groups receiving treatment, with 41% of clinical trials reporting an improvement in the pre-specified hypothesis. Animal experiments were not effective in predicting individual trial results, nor the level of neuroprotection, however, there was a fair agreement between the direction of the animal and clinical outcomes when looking at the overall direction of drug outcome. As a drug screening tool, experimental stroke studies need refinement. Rational frameworks for translational research will help.

Download and Read Free Online Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies Victoria E. O'Collins, Geoffrey A. Donnan, Malcolm R. Macleod, David W. Howells

From reader reviews:

Julia Hanson:

Hey guys, do you would like to finds a new book to read? May be the book with the headline Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies suitable to you? The particular book was written by well known writer in this era. The book untitled Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies is the one of several books in which everyone read now. This kind of book was inspired a lot of people in the world. When you read this guide you will enter the new dimensions that you ever know just before. The author explained their concept in the simple way, thus all of people can easily to understand the core of this guide. This book will give you a great deal of information about this world now. So you can see the represented of the world within this book.

Jeffrey Haller:

Often the book Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies has a lot of information on it. So when you read this book you can get a lot of gain. The book was authored by the very famous author. Tom makes some research prior to write this book. This book very easy to read you will get the point easily after looking over this book.

Douglas Stevens:

A lot of guide has printed but it is different. You can get it by net on social media. You can choose the most beneficial book for you, science, comedy, novel, or whatever by searching from it. It is identified as of book Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies. You can contribute your knowledge by it. Without departing the printed book, it may add your knowledge and make an individual happier to read. It is most important that, you must aware about guide. It can bring you from one destination for a other place.

April Brooks:

Some individuals said that they feel fed up when they reading a book. They are directly felt the idea when they get a half regions of the book. You can choose the book Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies to make your current reading is interesting. Your own skill of reading expertise is developing when you similar to reading. Try to choose easy book to make you

enjoy to study it and mingle the idea about book and reading through especially. It is to be initial opinion for you to like to open up a book and learn it. Beside that the reserve Animal Models for the Study of Human Disease: Chapter 23. Animal Models of Stroke Versus Clinical Stroke: Comparison of Infarct Size, Cause, Location, ... and Efficacy of Experimental Therapies can to be your friend when you're really feel alone and confuse using what must you're doing of this time.
