Handbook of Magnetic Measurements (Series in Sensors)

Slawomir Tumanski

Handbook of Magnetic Measurements (Series in Sensors) Slawomir Tumanski

While magnetic devices are used in a range of applications, the availability of up-to-date books on magnetic measurements is quite limited. Collecting state-of-the-art knowledge from information scattered throughout the literature, **Handbook of Magnetic Measurements** covers a wide spectrum of topics pertaining to magnetic measurements. It describes magnetic materials and sensors, the testing of magnetic materials, and applications of magnetic measurements.

Suitable for specialists as well as readers with minimal knowledge of magnetic measurements, the book begins with an easy-to-follow introduction to the essentials of magnetic measurements. It then offers a comprehensive review of various modern magnetic materials, such as soft and hard magnetic materials and thin magnetic films. The text also describes all commonly used magnetic field sensors, including inductive, fluxgate, Hall, magnetoresistive, resonance, SQUID, magnetoelastic, and magneto-optical sensors. The final chapters discuss the nondestructive testing of materials and explore applications related to magnetic measurements, including magnetic diagnostics in medicine, magnetoarcheology, and magnetic imaging.

A thorough overview of magnetic measurements, this handbook helps readers navigate the sometimes impenetrable terms of the field. It also assists them in the quest to design electromagnetic devices in a more effective way.

From reader reviews:

Edna McArdle:

The particular book Handbook of Magnetic Measurements (Series in Sensors) will bring you to the new experience of reading a book. The author style to clarify the idea is very unique. In the event you try to find new book to read, this book very acceptable to you. The book Handbook of Magnetic Measurements (Series in Sensors) is much recommended to you to study. You can also get the e-book from your official web site, so you can more readily to read the book.

Patricia Steele:

Reading a e-book tends to be new life style on this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Along with book everyone in this world could share their idea. Guides can also inspire a lot of people. Many author can inspire their own reader with their story or maybe their experience. Not only situation that share in the textbooks. But also they write about the information about something that you need example. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors in this world always try to improve their proficiency in writing, they also doing some study before they write for their book. One of them is this Handbook of Magnetic Measurements (Series in Sensors).

Martin Norwood:

Spent a free time for you to be fun activity to complete! A lot of people spent their sparetime with their family, or their own friends. Usually they doing activity like watching television, going to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your own free time/ holiday? Could possibly be reading a book can be option to fill your free time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to test look for book, may be the publication untitled Handbook of Magnetic Measurements (Series in Sensors) can be great book to read. May be it can be best activity to you.

Tabitha Devore:

Don't be worry if you are afraid that this book can filled the space in your house, you will get it in e-book approach, more simple and reachable. That Handbook of Magnetic Measurements (Series in Sensors) can give you a lot of buddies because by you investigating this one book you have point that they don't and make anyone more like an interesting person. This particular book can be one of a step for you to get success. This e-book offer you information that might be your friend doesn't recognize, by knowing more than other make you to be great persons. So , why hesitate? We need to have Handbook of Magnetic Measurements (Series in Sensors).
