Beyond Trauma: Cultural and Societal Dynamics (Springer Series on Stress and Coping)

The editors of Beyond Trauma: Cultural and Societal Dynamics have created a volume that goes beyond the individual's psychological dynamics of trauma, exploring its social, cultural, political, and ethical dimensions from an international as well as a global perspective. In the opening address as International Chair of the First World Conference of the International Society for Traumatic Stress Studies on Trauma and Tragedy: The Origins, Management, and Prevention of Traumatic Stress in Today's World, June 22-26, 1992, Amsterdam, The Netherlands, the conference that formed the foundation for the collected chapters in this volume, I commented: This meeting is a landmark in accomplishing the Society's universal mission. Our distinguished International Scientific Advisory Committee and Honorary Committee, whose membership was drawn from over 60 countries, the cooperation of six United Nations bodies, and the participation and endorsement of numerous nongovernmental organizations and institutions attest to the Society's emerging presence as a major international forum for professionals of all disciplines working with victims and trauma survivors.
