Graph-based Natural Language Processing and Information Retrieval

Rada Mihalcea, Dragomir Radev

Graph-based Natural Language Processing and Information Retrieval Rada Mihalcea, Dragomir Radev
Graph theory and the fields of natural language processing and information retrieval are well-studied disciplines. Traditionally, these areas have been perceived as distinct, with different algorithms, different applications and different potential end-users. However, recent research has shown that these disciplines are intimately connected, with a large variety of natural language processing and information retrieval applications finding efficient solutions within graph-theoretical frameworks. This 2011 book extensively covers the use of graph-based algorithms for natural language processing and information retrieval. It brings together topics as diverse as lexical semantics, text summarization, text mining, ontology construction, text classification and information retrieval, which are connected by the common underlying theme of the use of graph-theoretical methods for text and information processing tasks. Readers will come away with a firm understanding of the major methods and applications in natural language processing and information retrieval that rely on graph-based representations and algorithms.

From reader reviews:

Luis Acosta:

This Graph-based Natural Language Processing and Information Retrieval book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is usually information inside this publication incredible fresh, you will get info which is getting deeper a person read a lot of information you will get. This particular Graph-based Natural Language Processing and Information Retrieval without we realize teach the one who examining it become critical in imagining and analyzing. Don't end up being worry Graph-based Natural Language Processing and Information Retrieval can bring once you are and not make your bag space or bookshelves' come to be full because you can have it with your lovely laptop even cellphone. This Graph-based Natural Language Processing and Information Retrieval having fine arrangement in word along with layout, so you will not really feel uninterested in reading.

Tasha Page:

Reading a book can be one of a lot of task that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a guide will give you a lot of new facts. When you read a book you will get new information simply because book is one of various ways to share the information or their idea. Second, looking at a book will make an individual more imaginative. When you reading through a book especially hype book the author will bring someone to imagine the story how the people do it anything. Third, you could share your knowledge to some others. When you read this Graph-based Natural Language Processing and Information Retrieval, you are able to tells your family, friends in addition to soon about yours guide. Your knowledge can inspire others, make them reading a reserve.

Daniel Bailey:

A lot of people always spent their free time to vacation or even go to the outside with them family members or their friend. Are you aware? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. If you wish to try to find a new activity that's look different you can read any book. It is really fun for you. If you enjoy the book that you just read you can spent the entire day to reading a publication. The book Graph-based Natural Language Processing and Information Retrieval it is quite good to read. There are a lot of people who recommended this book. We were holding enjoying reading this book. Should you did not have enough space bringing this book you can buy the e-book. You can m0ore very easily to read this book from your smart phone. The price is not too expensive but this book provides high quality.

Dallas Richardson:

Beside this kind of Graph-based Natural Language Processing and Information Retrieval in your phone, it could give you a way to get more close to the new knowledge or data. The information and the knowledge you are going to got here is fresh from your oven so don't end up being worry if you feel like an previous

people live in narrow town. It is good thing to have Graph-based Natural Language Processing and Information Retrieval because this book offers for your requirements readable information. Do you often have book but you would not get what it's interesting features of. Oh come on, that will not end up to happen if you have this in your hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss the idea? Find this book along with read it from now!
