Well-Architected Fluoropolymers: Synthesis, Properties and Applications

Bruno Ameduri, Bernard Boutevin

Well-Architected Fluoropolymers: Synthesis, Properties and Applications Bruno Ameduri, Bernard Boutevin

Because of the increasing need for ever better performing materials endowed with specific properties, macromolecular engineering has become a useful tool for designing well-architected polymers (telomers, telechelics, stars, dendrimers, alternating, block- and graftcopolymers). These polymers are nowadays seeing an enormous growth. Among them, fluoropolymers are seen as high value added materials in many applications ranging from surfactants, optical fibers, biomaterials, coatings, to membranes for fuel cells. Indeed, the relationship between structure of the monomer to the properties of the polymers is of increasing interest so that these properties are tuned for the most appropriate applications. As most fluoropolymers are prepared from radical synthesis, this book devotes various parts on the use of the controlled radical (or pseudo-living) polymerisation of fluoromonomers leading to discoveries of thermoplastic elastomers or original surfactants for polymerisation in supercritical CO₂.

Well-Architected Fluoropolymers: Synthesis, Properties and Applications, is composed of five chapters starting with a general introduction outlining basic concepts. Emphasis is placed on recent developments, and each chapter describes comprehensive techniques of synthesis of well-defined fluorotelomers or polymers, their properties, characterisations, and their applications, for immediate use by today's engineers, industrial and academic scientists, and researchers.

The book has been arranged to enable self-managed reading and learning. It is both a source of data and a reference.

- On the synthesis, properties and applications of fluoropolymers: remarkable, high value added materials applied in surfactants, optical fibres, biomaterials, coatings and membranes for fuel cells.
- For immediate use by today's engineers, industrial and academic scientists, and researchers
- Written to enable self-managed reading and learning, being both a source of data and a reference.

From reader reviews:

Eleanor Landa:

Have you spare time for just a day? What do you do when you have far more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to often the Mall. How about open or perhaps read a book allowed Well-Architected Fluoropolymers: Synthesis, Properties and Applications? Maybe it is being best activity for you. You already know beside you can spend your time with the favorite's book, you can smarter than before. Do you agree with their opinion or you have various other opinion?

Homer Douglas:

The reserve untitled Well-Architected Fluoropolymers: Synthesis, Properties and Applications is the reserve that recommended to you you just read. You can see the quality of the publication content that will be shown to you. The language that writer use to explained their way of doing something is easily to understand. The copy writer was did a lot of analysis when write the book, and so the information that they share to you personally is absolutely accurate. You also can get the e-book of Well-Architected Fluoropolymers: Synthesis, Properties and Applications from the publisher to make you much more enjoy free time.

Denise Rutledge:

Do you have something that you enjoy such as book? The book lovers usually prefer to choose book like comic, quick story and the biggest you are novel. Now, why not attempting Well-Architected Fluoropolymers: Synthesis, Properties and Applications that give your enjoyment preference will be satisfied through reading this book. Reading practice all over the world can be said as the opportunity for people to know world considerably better then how they react to the world. It can't be stated constantly that reading addiction only for the geeky individual but for all of you who wants to become success person. So , for all of you who want to start studying as your good habit, it is possible to pick Well-Architected Fluoropolymers: Synthesis, Properties and Applications become your own personal starter.

Mae Mosley:

Many people spending their time frame by playing outside having friends, fun activity along with family or just watching TV the whole day. You can have new activity to pay your whole day by examining a book. Ugh, think reading a book can actually hard because you have to take the book everywhere? It fine you can have the e-book, getting everywhere you want in your Cell phone. Like Well-Architected Fluoropolymers: Synthesis, Properties and Applications which is keeping the e-book version. So , why not try out this book? Let's see.
