## Global Forest Monitoring from Earth Observation (Earth Observation of Global Changes)

Forests provide a large range of beneficial services, including tangible ones such as timber and recreation, and intangible services such as climate regulation, biodiversity, and watershed protection. On the other hand, forests can also be considered roadblocks to progress that occupy space more productively used for agriculture, making consideration of their regulating services crucial for balancing land use and forest loss. Monitoring forest cover and loss is critical for obtaining the data necessary to help define what is needed to maintain the varying forest service requirements in different parts of the world. There is an increasing need for timely and accurate forest change information, and consequently a greater interest in monitoring those changes.

**Global Forest Monitoring from Earth Observation** covers the very recent developments undertaken for monitoring forest areas from global to national levels using Earth observation satellite data. It describes operational tools and systems for monitoring forest ecosystems, discussing why and how researchers currently use remotely sensed data to study forest cover and loss over large areas. The book introduces the role of forests in providing ecosystem services and the need for monitoring their change over time, followed by an overview of the use of earth observation data to support forest monitoring. It discusses general methodological differences, including wall-to-wall mapping and sampling approaches, as well as data availability.

This book provides excellent coverage of the research and applications of forest monitoring, indicator mapping at coarse spatial resolution, sample-based assessments, and wall-to-wall mapping at medium spatial resolution using optical remote sensing datasets, such as MODIS and Landsat. It examines the use of radar imagery in forest monitoring and presents a number of operational systems, from Brazil's PRODES and DETER products to Australia's NCAS system. Written by leading global experts in the field, this book offers a launch point for future advances in satellite-based monitoring of global forest resources. It gives readers a deeper understanding of global forest monitoring methods and shows how state-of-the-art technologies may soon provide key data for creating more balanced policies.

### **From reader reviews:**

#### **Ryan Daggett:**

Inside other case, little people like to read book Global Forest Monitoring from Earth Observation (Earth Observation of Global Changes). You can choose the best book if you'd prefer reading a book. So long as we know about how is important a book Global Forest Monitoring from Earth Observation (Earth Observation of Global Changes). You can add understanding and of course you can around the world by just a book. Absolutely right, since from book you can understand everything! From your country until foreign or abroad you will be known. About simple factor until wonderful thing you may know that. In this era, we can open a book or maybe searching by internet product. It is called e-book. You need to use it when you feel weary to go to the library. Let's read.

#### **Carol Sage:**

Book is usually written, printed, or descriptive for everything. You can understand everything you want by a book. Book has a different type. To be sure that book is important point to bring us around the world. Close to that you can your reading ability was fluently. A guide Global Forest Monitoring from Earth Observation (Earth Observation of Global Changes) will make you to possibly be smarter. You can feel much more confidence if you can know about every thing. But some of you think that open or reading some sort of book make you bored. It is far from make you fun. Why they are often thought like that? Have you in search of best book or appropriate book with you?

#### **Lola Hernandez:**

Hey guys, do you desires to finds a new book to read? May be the book with the name Global Forest Monitoring from Earth Observation (Earth Observation of Global Changes) suitable to you? The particular book was written by well known writer in this era. The actual book untitled Global Forest Monitoring from Earth Observation (Earth Observation of Global Changes)is a single of several books which everyone read now. This specific book was inspired a number of people in the world. When you read this reserve you will enter the new dimension that you ever know just before. The author explained their strategy in the simple way, so all of people can easily to recognise the core of this reserve. This book will give you a wide range of information about this world now. To help you to see the represented of the world on this book.

#### **Willie Grajeda:**

The book untitled Global Forest Monitoring from Earth Observation (Earth Observation of Global Changes) contain a lot of information on it. The writer explains your ex idea with easy technique. The language is very easy to understand all the people, so do definitely not worry, you can easy to read it. The book was compiled by famous author. The author provides you in the new time of literary works. It is easy to read this book because you can read on your smart phone, or gadget, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can open their official web-site in addition to order it. Have a

nice read.
