Sinossi

L'autore, constatata la sovrapposibilità del giorno di nascita di genitori e primogenito, indaga su un probabile rapporto tra le cifre espressione del loro mese ed anno di nascita. Non solo individua tale rapporto, ma scopre che unendo su determinate colonne ogni cifra a quella che algebricamente la segue si ottiene in maiuscolo la lettera iniziale del nome della moglie.

L'autore sfruttando un particolare delle tre date di nascita tenta di prevedere il numero di generazioni che potrebbero seguire alla prima, senza rinunciare all'analisi della data di nascita dei componenti la generazione successiva alla prima, date di nascita che si scopre siano unite fra di loro da altri particolari rigidamente matematici.
